

Ghana Digital Gold x Cudiwallet

Executive Summary

The Ghana Digital Gold framework is a blockchain-powered economic model designed to digitize Ghana's gold reserves and enable secure, peer-to-peer (P2P) exchanges for land ownership, property rights, and economic access. This initiative, powered by Cudiwallet.com, merges national resources with digital innovation to create scalable employment, asset access, and financial growth for over 15 million citizens.

Problem Statement

Ghana's economy is restricted by foreign-dominated investment models, an underutilized local currency, and poor access to credit and asset ownership among its citizens. Additionally, land ownership remains inaccessible for many due to bureaucratic and verification issues. There is no unified digital system to tokenize national assets and enable transparent, equity-based participation.

Solution

BankGhanaGold.com digitizes Ghana's natural gold reserves as tokenized assets. These assets are then distributed and traded via Cudiwallet's platform, which provides a secure, verified blockchain structure to manage access, identity, land registration, and passive income generation.

Key Services

- Digital Security & Identity Management
- Staking & Mining Income (Bitcoin Autominers)
- P2P Transactions
- Land & Rental Loan Services
- 'Asurance' Verification for Tourists & Property Renters
- Eccormance: Economic Performance-Based Access
- Career Development & Digital Training

Operational Structure

Access Deposits:

- Standard Users: 180 Cudi Coins
- Miners: 98,000 Cudi Coins
- Ghana Nationals (Discounted): 9,800 Cudi Coins

Charges:

- Transaction Fee: 0.5%
- Management: 0.3%
- Miner Commission: 0.2%
- Elastic Exchange Cap: 18%

Equity-Based Utility:

- Land registration
- Property rights
- Identity-verified asset control
- Income from validated transactions

Target Impact

- Train & certify 15,000,000 users
- Maintain risk levels within 18% of P2P transactions
- Enable tokenized land ownership for Ghanaian citizens
- Facilitate sale of up to \$50M Ghana Digital Gold in 3 years

Licensing & Regulatory Request

We propose a 3% royalty on all GDG sales and a 3% tax on GDG<->CudiCoin exchanges. We seek recognition of Cudiwallet as the official operator under the Ministry of Digital Establishment.

Confidential Notes

Marketing strategies and partnerships remain confidential, shared only via NDA.
